SOS®
Your trust. Our commitment.

Very often, new ideas and innovations are born out of necessity, business objectives and goals.

But when something is born out of pure inspiration and passion, the result is special & unique.

For us at SOS, dewɔt™ is that special thing!

dewɔt has been created by a fusion of inspiration and passion leveraging the best of Design, Wellness and Technology to bring to you a bouquet of chairs that provides a superlative experience of luxury, comfort and wellness.

I earnestly hope that the love and passion that has gone into this brand is visible in every single product that dewɔt offers - no matter from which of our ranges - Designer, Premium, Classic or Universal.

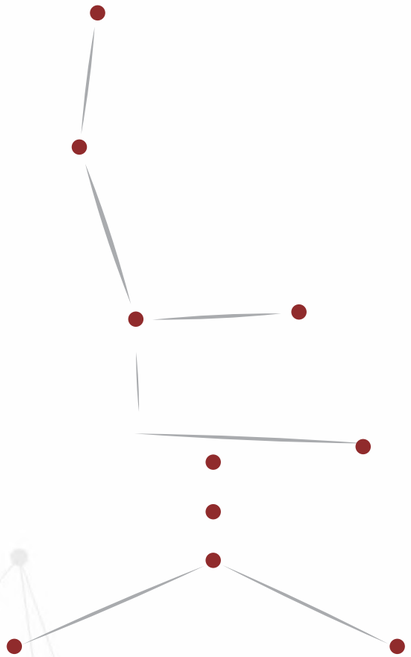
Indeed dewɔt™ is an ethos and a brand like never before.

I am delighted to invite you to take the tour.

best wishes,

Nitin Sudame
Founder Director,
Spacewood Office Solutions

What's the science of seating?



Seating is about providing right posture and support to the human body in its seated position.

The science of seating is the study of achieving this through a fusion of Design, Wellness & Technology

Design

Design should never be compromised as aesthetics and looks are fundamental elements that put humans at ease and create positivity.

Wellness

Human wellness should be put ahead of everything. The objective of seating should be to transform users into a state of superlative and natural comfort.

Technology

Safety and durability should be a top priority. This demands precision engineering, use of safe materials and the highest standard of quality and testing.

"Science knows no boundary, because knowledge belongs to humanity, and is the torch which illuminates the world."

– Louis Pasteur

Design approach

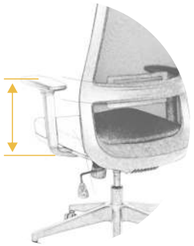
In order to give optimum support to the body, the design approach involves a thorough study, so that the head, neck, back, arms, pelvis, thighs and knees are well supported and the body is free from stress and pressure points.

Head & Neck

Headrest slightly flexes to keep neck relaxed

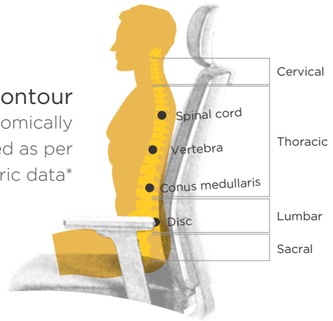
Arm support

Armrest enables keeping elbow in relaxed position



Back contour

Backrest is ergonomically designed as per Anthropometric data*

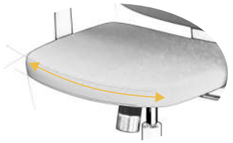


Seat height

Adjustable seat height to ensure feet are placed flat on the floor

Seat Profile

Designed to eliminate pressure points under thighs or knees



*Anthropometric data of human body size and shape considered to design a product

The Science of Seating

Seating is about providing right posture and support to the human body in its seated position. This involves the study of anatomy, anthropometrics, physiological and bio-mechanical characteristics of human body to provide;

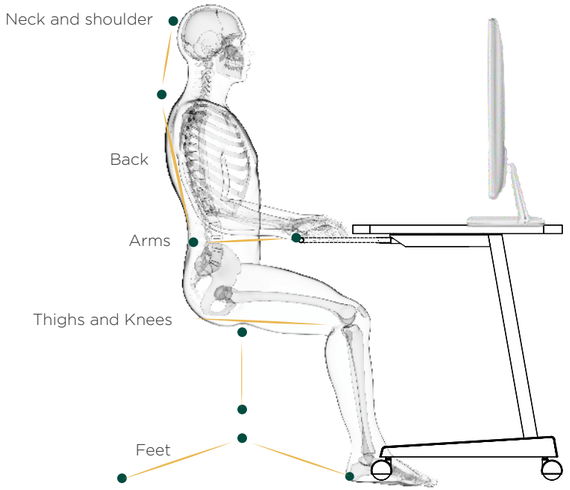
ergonomics

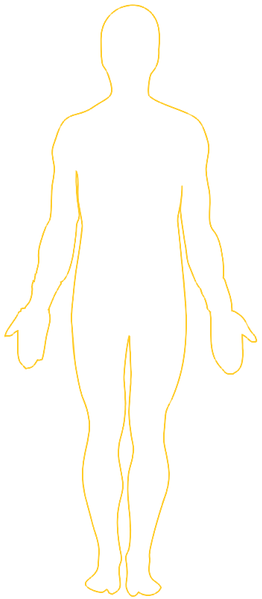
comfort

safety

aesthetics

productivity





Quality and testing to deliver the best

BIFMA testing is a true bench mark for durability of chairs, thanks to rigorous life cycle testing and certification of all critical components of chairs.

All SOS chairs are tested as per guide lines of ANSI/BIFMA X5.1-2017: General-Purpose Office Chair-American National Standard for Office Furniture.

- Backrest
  45 kg, 120000 cycles @ 10-30 cycles / min
- Armrest
  41 kg each arm, 60000 cycles
- Seat
  55 kg on seat, 120000 cycles @ 10-30 cycles / min
- Mechanism
  109 kg on seat, 3,00,000 cycles @ 10-30 cycles / min
- Gas-lift
  122 kg on seat, 60,000 cycles rotation @ 5-10 rotation / min
- Base (Al / Nylon)
  1,450 / 1,150 kg
- Castors
  102 kg on seat, 1,00,000 cycles

BIFMA COMPLIANT

Our in-house lab setup enables us to thoroughly test products ensuring an uncompromising quality that meets BIFMA standards.

some glimpses of testing

SOS - India’s young and fastest growing modular office and seating solutions provider

Spacewood Office Solutions has emerged as one of the most preferred furniture suppliers with over 60% of the retention clients against a base of over 2500 customers and has executed 8000+ projects installed across the country. SOS provides a one stop comprehensive products for office furniture, seating, collaborative, technology & wellness and acoustic solutions for new age offices.

What makes dewet™ special?

The dewet brand uses the best of materials carefully chosen to give you a superlative experience of luxury, comfort and wellness.

Aesthetics & design

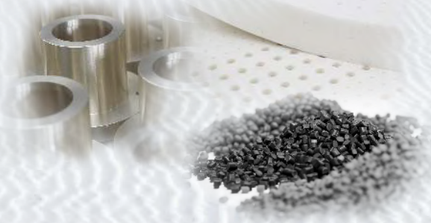
dewet chairs are designed to create a long lasting impression in the new age workspaces

Personal Hygiene & safety

dewet chairs are upholstered with anti-microbial and water repellent fabric which gives protection against any bacteria, thereby reducing odour, providing better hygiene and stain resistance

The SOS trust

dewet chairs come with the reliability and trust of SOS group – a legacy built over two decades



BIFMA certified

dewet key components are tested and certified as per ANSI/BIFMA X5.1 & X7.1 and use highest grade of materials - virgin plastics, low carbon steels and Chlorofluorocarbons (CFC) free polyurethane foams

Warranty

dewet chairs come with a warranty of up to 5 years* from date of supply

inspired design and
precision technology
bring the magic to life!

*designer and premium range come with 5 year warranty

Powered by commitment, driven by values

Spacewood Office Solutions is committed to delivering the best in office seating solutions by leveraging every resource at its command without compromising its cherished values and principles.

Our guiding principles

Human Wellness

Put human wellness first - before every single thing

Proudly Indian

Maximise usage of local resources and contribute to nation-building

Eco-friendly Products

Be aware that the key to a greener planet is entirely in our hands

Global Collaboration

Bring about cross breeding of the best of global concepts and ideas

People Centric

Bring a human touch and deep commitment towards people in everything

Global Standards & Certifications

SOS is a member of BIFMA and is one of the leading Indian brands offering environmentally sustainable products as per ANSI/BIFMA e3-2014 standards*. BIFMA compliance gives manufacturers, suppliers, architects, designers and government agencies a benchmark for production of sustainable office / institutional furniture and seating products. This mark establishes performance criteria that address environmental, economic and social aspects throughout the supply chain.

SOS' commitment towards Industrial practices, environmental and social impact

SOS maintains the highest quality and safety standards and has certifications like ISO 9001-2015, ISO 14001-2015 and ISO 45001-2018.

SOS' state-of-the-art manufacturing plant at Nagpur is IGBC Green Gold certified.

SOS offers GreenPro certified products. GreenPro label is a mark of guarantee that the product is environment friendly through its life cycle.

About BIFMA

Business and Institutional Furniture Manufacturer's Association (BIFMA) is a not-for-profit trade association for business and institutional furniture manufacturers. Since 1973, BIFMA has been the voice of the commercial furniture industry. Our industry's service to our customers – providing healthy, comfortable, and productive workspaces – rests on an infrastructure of engineering and materials standards. These standards, founded on centuries of craft and enhanced by ever-advancing science, embody the best of our knowledge on safety, ergonomics, and sustainability.

BIFMA standards for office seating

- ANSI/BIFMA X5.1 Office Chairs is typically used to provide safety and performance requirements for chairs that are primarily designed for use in office environments. Examples include, but are not limited to, seating styles typically referred to as executive / management, task / secretarial, side / guest chairs, nesting and/or folding chairs. These chairs are for single occupants and the tests are based on the 95th percentile male body weight (currently 275 lbs.). Chairs may include features such as stacking, stool and tablet arm.
- ANSI/BIFMA X7.1- Standard for Formaldehyde & TVOC emissions defines the acceptance criteria for VOC emissions from furniture used in offices to be classified as low-emitting product and should be used in conjunction with the ANSI/BIFMA M7.1 Standard Test method for determining VOC emissions from office furniture systems, components and seating.

SOS' adherence to safety, durability and sustainability standards

To ensure product performance and inspire confidence, dewet range of chairs are rigorously tested at our in-house lab and at BIFMA certified labs where qualified experts confirm the product's and company's compliance with BIFMA standards for promoting better health and a cleaner environment.

Product certifications

ANSI / BIFMA X5.1 certification for safety and performance

All components tested as per BIFMA standards

ANSI / BIFMA X7.1 certification for determining VOC emissions

*key components of dewet are tested and certified as per ANSI/BIFMA X7.1 for VOC and most of the chairs are ANSI/BIFMA X5.1 certified for safety and performance.

Caring for your chair

With regular care and maintenance, your dewet chairs will provide many years of superior performance and satisfaction. To maintain the quality of your dewet chair, please follow the cleaning procedures outlined here.

Base, Frame and Arm pads

Normal cleaning

- Wash surface with a soft cloth soaked in mild detergent and warm water
- Rinse thoroughly and dry with a soft cloth
- Do not use solvents or abrasive kitchen cleaners

Fabrics

Water-based stains such as coffee, soft drinks, fruit juices or milk

- Use a water-based cleaner (specifically made for cleaning fabric) or a solution of mild (alkaline) warm soapy water (not overly soapy) applied with a damp clean cloth or sponge
- Work the cleaner into a lather or foam
- Soak up all remaining solution and then use a clean cloth or sponge dipped in cool water to remove any residue
- Never use hot water; it will set the stain
- Avoid scrubbing

Oil-based stains such as lipstick, grease or salad dressing

- Use a dry cleaning solution applied with a damp clean cloth or sponge
- Test the cleaning solution on a small, concealed area first
- If there is no spotting, ringing, or damage to the fabric or its dyes, apply the cleaning solution to the soiled area with light, quick strokes. Start from the outside of the stain and work toward the centre, being careful not to over-saturate the fabric
- Do not over apply water or any liquid solution on the fabric
- Excessive wetting of the fabric with any liquid solution may result in permanent damage
- Do not rub too vigorously as it may damage the nap of the fabric or the fabric fibers may break
- Several light applications are better than one heavy application
- Soak up all remaining solution and then use another clean cloth or sponge dipped in cool water to remove any residue
- Let fabric dry thoroughly and then vacuum well before using
- If the stain resists cleaning, contact a professional cleaner
